## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Govzman et al..

The patent to Govzman et al. shows a suction control unit comprising a travel body (40) for handling flat plates (14,16) between various "tables" (20-26). The travel body contains a suction contact surface (102) with a pressure sensor (96) coupled thereto such that the plate being handled is repositioned if the detected suction pressure is insufficient (see col. 6, lines 20-25 and 34-37).

### ***Specification***

3. The abstract of the disclosure is objected to because it contains legal phraseology such as "means" in lines 6 and 9 which should be avoided. Correction is required. See MPEP § 608.01(b).

***Priority***

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanaka shows a suction gripping assembly having a plurality of adjustable suction pads.
